

Cardboard Balers

Your comprehensive guide to buying or renting a cardboard waste baler

Best-selling cardboard balers

Looking for a cardboard baler to handle your packaging waste? With a number of vertical balers in our range, there are various solutions available for private and public sector organisations, large and small.

However, to help you with your search, we've selected our current most popular cardboard balers, which you can view below.

Low-Medium Volume

COMPACT CARDBOARD BALER – RWM 75

Ideal for low-medium volumes of waste, this compact cardboard baler is great for retailers, offices, hotels, fast food outlets and other SMEs. With a small footprint this machine will slot neatly into the user's surroundings.

Medium Volume

MID-RANGE CARDBOARD BALER – RWM 250

Capable of producing bales of up to 250kg, this cardboard baler is a popular choice with manufacturers, hospitals, warehouses and logistics firms. With a larger door opening than the RWM75 above, this machine is better for bulkier and larger volumes of bulkier cardboard.

High Volume

MILL SIZE CARDBOARD BALER – RWM 500

One of our biggest cardboard balers, this robust machine will produce mill sized bales that optimise transport loads and revenue generation. It is commonly used by recyclers and larger organisations such as distribution outlets and busy manufacturers, and will handle bulky/large volumes of cardboard with ease.

Did you know

We don't just supply cardboard balers. We service such machines too and stock a range of competitively priced consumables to ensure you create the perfect cardboard bale.

We even offer a waste consultancy service to help you achieve a maximum return on investment from your waste handling equipment. It's all part of the service.
